Abstract (en)

[origin: DE19743793A1] The shelving (2) has several superposed inclined shelf bases (6) whose vertical projection runs in the direction of the longitudinal extension of the conveyor belt (5). The individual bases have a parallel article chute (7) with the same incline and set above the conveyor belt so that its lower end is in the contact-free area of the belt. All the shelf bases have the same incline and an article stop formed by fit-in cross dividers (8).
