Abstract (en)  
[origin: WO9916952A1] Apparatus for the conditioning of textile articles comprises an elongate tunnel (1), conveyor means (10) for moving hanging articles through the tunnel, means (7, 8) for extracting air from the tunnel, for treating the extracted air to adjust the humidity and/or temperature thereof and for reintroducing the treated air back into the tunnel, and at each of a plurality of portions of the tunnel, separate means (6, 9) for extracting air from the tunnel and for blowing the extracted air on to the articles passing through the respective portion. A packaging system for textile articles comprises such a conditioning apparatus and, at the end of the tunnel (1) from which the articles emerge, vacuum packing apparatus for sealing the articles in plastics film under reduced pressure.
