Abstract (en)

[origin: DE19742983A1] The invention relates to a concrete ring for use as a counterweight on the lye container of a washing machine. The concrete ring is produced continuously with a ring part (1) which has a U-shaped cross-section and which is open at one end. Said ring part (1) is filled with a mass containing concrete and a connecting device (16) is provided on its outer periphery. The connecting device (16) can be connected to the lye container (17).
