Abstract (en)

[origin: EP1020364A2] The packing machine's device(9) for withdrawal and placing of the respective blanks(8), and the unit(10) for transporting the placed blanks, are vertically adjustable. The magazine(7) for the blanks may also be vertically adjustable. The conveyor unit has one or more carriers(2) which advance the product lying upon the support base(24) and are vertically adjustable. A vertically adjustable unit is provided for rotation and simultaneous feed of the packing of the partially packed product.
