Abstract (en)

[origin: EP1020389A2] The winding roller has an associated cutter (12) mounted on a cutter support (13) which is fixed on retaining arms (17) which swivel about the rotational axis (19) of the support roller (2). The cutter support can be fixed for articulated movement with at least one retaining arm having a secondary drive (22) for changing the angle between arm and support.
