Abstract (en)

[origin: EP1020581A2] Sealing lips (10, 12) extend from the longitudinal sides faces (11) of a core (4) with at least one cavity (5). Outer lips cover the external opening of the gap (2) and additional sealing lips support the glass sheet or panel surfaces (13) defining the gap. An anchoring extension (15) attaches the seal to a groove (8) of the supporting structure.
