Abstract (en)

[origin: EP1482121A1] The device (1) has at least two metal profiles (2,3) that are connected together and held a distance apart with a gap (4) between them in which a fire and/or heat-resistant isolation material (5) is arranged. The surface of the isolation material is arranged on at least one side of the profile offset inwards in relation to the lateral profile surface to form a recess (10) between the surfaces of the metal profiles.
