Abstract (en)

[origin: FR2787227A1] A vehicle may be fitted with an integral device (1) which comprises a localization module (11,12), a communication module (13,14), a microcontroller (10) and sensors and actuators (15,16). The microcontroller is connected to the ignition key (100) and there is communication to a remote server (4) and a mobile unit (2) able to detect shocks or abnormal conditions and to transmit data to the remote server (4)
