Abstract (en)

[origin: EP1021069A2] A microwave oven has a standing wave magnetic field detecting device. The device oven includes a sensor (500; 556; 600; 700; 800) having a loop portion which is protrudes into a waveguide (10) of the microwave oven. One end of the loop is grounded to the outside face of a wall of the waveguide (10). <IMAGE>
