Abstract (en)
[origin: WO0009364A1] An air bag storage portion (22a) of a cover member (25) that covers a seat back (22) is formed by sewing up a seat-back front cover element (25a), a side cover element (25b), etc. An air bag module (30) is provided with a casing (31) that contains an air bag (32) and an inflator (33) therein. The casing (31) includes a casing body (31a), which is fixed on a seat back frame (23), and a lid (31b) that is swingably provided on the casing body (31a) and situated between the casing body (31a) and the side cover element (25b). An extending portion (46) is formed on a corner portion (45) of the front part of the lid (31b) to which injection nozzles (34) of the inflator (33) is directed, extending forward to cover the corner portion (45).
