Abstract (en)
[origin: WO9913149A1] The present invention relates to a device for holding together stockings (2, 2A) which require to be washed for the entire duration of the washing process. In accordance with the invention, a dispenser (3) that is so arranged as to consist of a magazine (5A, 5B) with stocking holders (4) arranged to permit the attachment of stockings (2, 2A) in pairs before the stocking are washed and until after the washing is complete, is so arranged as to function as a support in conjunction with the attachment.
