Abstract (en)

[origin: FR2769677A1] The hydraulic feed for changing up or changing down gears is obtained by emptying the first operator and filling a second operator which control the clutches (E1,E2,E3) or the band brakes (F1,F2,F3,F4). The gear change can be found in one of the following conditions: a) emptying or empty without any particular control, b) in phase with active control for its filling in changing up under the pressure PL, c) in phase with active control for its emptying in changing up or refilling in changing down under a second pressure P2.
