Abstract (en)

The package consists of a transparent plastic sachet (1) to contain the displayed articles, attached to a card (2) with information about the articles and a hole (20) by which the package can be suspended from a display hook. The card is made from a semi-rigid plastic, and the sachet is attached to it by a clip (3) made as part of the card and designed to retain the sachet's open upper edge. The clip can be made, for example, in the form of two hinged strips (30, 31), engaging by a tongue and groove (33) to trap the sachet edge. In variants the clip can be in the form of a separate rod pressed into a moulded recess in the card or a moulded projection and recess on two halves of a folded card.
