Abstract (en)

[origin: EP1022808A2] A spring clip is arranged on a current rail. A conductor inserted through a window opening is clamped against the underside of the current rail. At least one further conductor (15) is inserted above the current rail through the window opening, and clamped in an upper terminal position. The further conductor is inserted against the placement limb of the clip. The free end of the placement limb is bent away from the upper side of the current rail, so that it forms an insertion funnel.
