Abstract (en)

[origin: WO9833413A1] A brush implement for cleaning radiators includes a shaft (2) and a brush (3). The brush (3) has a planar basic shape and is provided with bristle members (6) projecting from opposite sides of a central plane. The shaft (2) has a thin and wide shape and is made from an elastic, flexible material, e.g. plastic. Therefore the shaft may on one hand be bent elastically and on the other hand guarantee a proper force transfer to the brush in a sideward direction.
