Abstract (en)
[origin: WO9920153A1] The invention concerns a structural assembly comprising rectangular panels (2) including chipped off corners and, along at least three edges, a longitudinal dovetailed profile, and vertical members (5) including at least two longitudinal grooves (6) with dovetailed profiles matching the profile of said panels. The dimensions of said panels, chipped off corners, dovetailed profiles, and vertical members being selected so as to assemble by sliding the vertical members and the panels to form a three-dimensional rigid and dismountable structure. The assembly can constitute a game or piece of furniture that can be mounted or dismounted without any other fixing means.
