Abstract (en)
[origin: WO9919146A1] The invention relates to a screen printing installation having a round screen (1) with a squeegee (2) and a counterpressure surface (3) fitted inside. Said installation has a device which is synchronized with the screen drive (1) and the counterpressure surface (3). This device controls the lifting off of the squeegee (2), and has at least one cam (14) which moves the squeegee (2) into the desired position by means of a squeegee lever (16).
