Abstract (en)
[origin: US6251511B1] A prefabricated roofing element in the form of a laminate consisting from its inner surface towards its outer surface exposed to poor weather conditions, of at least a first continuous layer constituting an element core based on a thermosetting binder and reinforcing materials, of a second continuous protective coating layer, consisting of a mixture of at least a synthetic resin, a constituent staining in its volume the resin and a catalyst. The roof cover element is characterized in that it further comprises at least a third discontinuous layer of paint unevenly distributed on the surface of the second layer and consisting of materials immiscible with the second layer constituents to form spots at the second layer surface.
