Abstract (en)

[origin: EP1023856A2] The container (1) has a compartment (2) into which a brush (6) is dipped and has an opening (3) in which sits a tapering stopper (4). The brush on a handle (7) is inserted through a hole. The handle with its end facing the brush is fixed to a container-head placed onto the opening for retaining the brush in the compartment filled with a hygienic mouth-refreshing agent. One brush is in the form of a inter-dental brush . The container forms a tooth-brush (10) handle whose end facing away from the tooth-brush head (12) is in the form of a container-top (9).
