Abstract (en)
[origin: EP1024240A1] The lock (1) consists of a bolt (5) fixed to a drawer (2) or cupboard door and held in a first position by a spring (12).. A control (6) is situated with the pivot mounted bolt in a housing (4). A fastening groove (15) is positioned in one side wall (3) of the cupboard. The outer shape of the housing matches the recessed grip of the drawer or door. The control has an angled lever (8). The bolt has a first surface (17) at right angles to the side wall and parallel with one surface (16) of the groove.
