Abstract (en)

[origin: WO9921424A1] A herbicidal composition comprising: (a) a herbicidally effective amount of N-phosphonomethyl glycine and/or a herbicidally active derivative of N-phosphonomethyl glycine or mixtures of N-phosphonomethyl glycine and a herbicidally active derivative of N-phosphonomethyl glycine or mixtures of derivatives of N-phosphonomethyl glycine; and (b) an effective amount of at least one activating surfactant of formula (I) wherein R represents an optionally substituted, saturated or unsaturated C1-C40 hydrocarbonyl group for example an alkyl or alkenyl group having from 1 to 40 carbon atoms and M is H or a positively charged counter ion, and preferably wherein M is selected from the group consisting of alkalis, alkali metals and alkaline earth metals, for example sodium or potassium, or from ammonium, alkylamines and aminoalcohols. The composition shows reduced irritancy particularly to the eyes.
