Abstract (en)
[origin: WO9917702A1] The present invention relates to a wash table used for transferring and washing a physically disabled person or a person unable to move. A device of the invention comprises a base (1) having prongs (2) provided with wheels, a vertical support (3) with a central bar (6) arranged thereto, and a treatment platform (5) attached to the base. Unlike in conventional devices, the treatment platform (5) is arranged to comprise at least three longitudinal, plane-like segments (7) which are parallel to each other. To facilitate washing operations, the segments are arranged to turn in relation to each other, the device being provided with a turning means (8) for turning adjacent segments about their longitudinal axis to opposite directions.
