Abstract (en)

[origin: DE19744135C1] Use of epothilone or epothilone derivatives for the production of an implant for inhibiting restenosis is claimed. Also claimed are medical implants, especially stents, with an epothilone derivative on their surface. Epothilone is described in Angew. Chem., 108, 1671 (1996) and Angew. Chem., 109, 543 (1997).
