Abstract (en)  
[origin: WO9924131A1] Puzzle comprising a number of puzzle elements (1, 2, 3) with an opening or transparent area (4) surrounded by a nontransparent surface (5), on which at least one part of a puzzle figure is depicted, and a base surface (12) on which at least one other part (9, 10, 11) of the puzzle figure is provided, so that the puzzle element (1, 2, 3) can be provided on the base surface (12) in a position whereby the opening or transparent area (4) thereof coincides with another figure part (9, 10, 11) and whereby this other figure part (9, 10, 11) and every figure part (6, 7, 8) of the puzzle element are visible together in the position which is required in order to assemble the puzzle figure. A puzzle element of such a puzzle, as well as such a puzzle element that is a collection element, destined to be provided in a specific position on a base surface provided for the collection. A method and an apparatus comprising a screen and selection means for assembling a puzzle figure according to the principle of such a puzzle.
