Abstract (en)

[origin: DE19847001A1] The sealing face (26) of the sealing lip (24) on the screw cap (2) is conical so that with the cap screwed on it lies upon an external seal edge (28) of the end face (16) of the mouth of the bottle. At least one recess (32) in the form of a radial channel is provided in the conical sealing face and extends from an area which lies outside the seal edge with the cap screwed on tight to the edge (34) of the sealing lip and is in communication with atmosphere.
