Abstract (en)
[origin: WO9920550A1] A conveyor system comprising a plurality of modular conveyor units, adapted to be assembled together in a desired layout, and a control system for controlling the operation of the conveyor units. The control system has a main control device (12) and control means (14-20) on at least some of the conveyor units, each control means (14-20) being adapted to control the operation of its associated conveyor unit or units in a predetermined sequence determined by the main control device (12), the sequence operating as predetermined until fresh control signals are sent from the main control device (12).
