Abstract (en)

[origin: US6502619B1] A safety and protection device for a raisable-curtain goods-handling door (1) has a flexible curtain including a single sheet fitted with at least one raising strap (10) disposed against the outside of the curtain, the device having an apron (7) placed against the curtain on the same face of the curtain as the straps, to cover the door from the vicinity of its bottom up to a height that is at least sufficient to provide the desired type of protection, and over a width that is at least sufficient to cover the straps, the apron being capable of being fixed to the curtain in such a manner as to avoid impeding the movements of the strap.
