Abstract (en)

[origin: WO9921109A2] A method of creating a link in a web page viewed in a browser is disclosed, said link at any time leading to one of a number of possible end points (5a-5e; 105, 106), the method comprising the steps of: providing an address table (9; 109) in or in connection to the host (7; 107) from which the web page is retrieved, said address table providing the addresses of the possible end points (5a-5e; 105, 106) at which the link may point, and when a user clicks on the link, selecting one of the possible end points (5a-5e; 105, 106) from the table (9; 109) and setting up a connection to said end point (5a-5e; 105, 106). An address table (9; 109) and a web server (7; 107) for use with the invention are also disclosed.
