Abstract (en)

Frying apparatus particularly useful in automatic vending machines is provided. The apparatus includes a housing (2) having an entrance (6) for introducing therein food articles to be fried and an exit (8) for outletting the food articles after having been fried; a frying compartment (3) within the housing for receiving a quantity of oil to produce an oil bath (4) therein; a heater (50) for heating the oil; and a conveyor assembly (9) including a conveyor control for conveying the food articles from the entrance, through the oil bath in the frying compartment, through a draining region between the oil bath and the exit, and then to the exit. <IMAGE>
