Abstract (en)

[origin: EP1025794A1] The dishwasher has a ballast mass (2) fixed to its body. It has a container (1) situated above a base (4) in which are disposed a certain number of connecting components, this base forming an open rear opening (40) allowing access to its connecting components. The ballast mass is fixed for serving as a closure for this rear opening. The components include a electric pump (6) suspended at this ballasting mass for absorbing vibrations.
