Abstract (en)
[origin: EP1025881A1] Brake has spring metal arch (2) articulated on sides on base (1). Flat open loop (25) is placed in median part, is placed on base and forms spring tending to hold brake in active position. Median part of arch carries tipping pedal (3). Pedal has protuberance (33) engaged in loop in brake raised position. Clamping of loop on protuberance ensures recovery of pedal when pressure is released.
