Abstract (en)

[origin: EP1025993A2] A transverse cutter (6) is positioned behind a former (4) in the direction of travel of the fast-moving webs (2). At least one adhesive-applicator (8) is positioned behind the transverse cutter and in front of the next folder (13) and applies continuous longitudinal lines of glue onto the separate cut-out piece (7). The adhesive-applicator is controlled in relation to the delivery speed of the cut-out pieces.
