Abstract (en)
A collapsible and extendible file assembly is formed from card or other semi-rigid bendable material. It comprises an outer casing 1 with an opening front panel 3 provided with foldable struts 9 which fold on crease lines 9' and when folded out prop a box-like part of the casing 1 comprising panels 5, 7, 8 apart from the front panel 3 thus allowing compartments 31 to open and hang down. The compartments 31 are for the storage of documents and are demarcated longitudinally by dividers 18 attached at each end to a respective concertina panel 20 attached to rear panel 7 of the box-like part. To be accompanied when published by Figure 7 of the drawings. <IMAGE>
