Abstract (en)

A door frame jamb assembly is provided for holding a door and is constructed as an integral unit for transport to the construction site and attachment to a door frame opening. The frame assembly is constructed of several portions, including a jamb portion (24) which is formed of wood and is the portion attachable to the door frame opening (12), a rigid vinyl extender portion (26) which is formed of cellular resin and is attached to the end of the jamb portion, and a rigid brick molding portion (44) which is also formed of cellular resin and has a notch (48) formed therein to receive the second end of the vinyl extender portion. <IMAGE>
