Abstract (en)
[origin: US6370714B1] Lounger beds have a lying surface made of a textile structure clamped into a frame to permit a division of the lying surface into areas with different tension. A textile structure with elastic threads is fastened to longitudinal spars of the frame. The top side, of the longitudinal space has a curved construction form supporting surfaces for the textile structure only in an exterior area. The longitudinal spars have receiving grooves only on the exterior side for the edge of the textile structure to be clamped in.
