Abstract (en)
[origin: WO9922091A1] The invention relates to the facing of buildings with an exterior brick facing, and more particularly to a preformed thermoplastic skin (1), shaped and sized to be received on the exterior surface of a building structure and configured on its exterior surface in a manner to receive facing masonry such as bricks (3) to produce a non-load bearing brick or masonry facade. In a further embodiment, such panels are configured so as to receive stone or other irregularly shaped masonry products to produce the facade.
