Abstract (en)
[origin: WO9922094A1] A gutter (12), for instance roof gutter, is known which comprises: a bearing structure (16) adapted for fixing to a building structure, such as a house, stable or other building; a gutter structure supported by this bearing structure (16) and comprising an elongate, substantially prismatic trough (3, 4, 5) open at the top for collecting and transporting liquid such as rainwater or manure to a drainage zone, for instance a rainpipe, wherein the trough (3, 4, 5) has a substantially prismatic form and has on both its upper edges (10, 11) substantially stiff coupling means which form part of this prismatic form or are separate (13, 14) and with which the trough (3, 4, 5) is coupled to the bearing structure (16) so as to be supported thereby along substantially its whole length.
