Abstract (en)

[origin: FR2770554A1] The invention concerns a method for installing a hanging scaffolding to a building front and system for implementing said method. The system is characterised in that it comprises a device for lifting assembled scaffolding elements (22, 29) and consists of first scaffolding elements (2) hooked manually on the building front (1) anchoring pins, from ground level, with a pole controlled by an operator remaining at ground level, the lifting device enabling the operator to lift the assembled scaffolding elements (22, 29) to a predetermined height for use. The invention is applicable in the building industry.
