Abstract (en)

[origin: WO9851904A1] An apparatus for bending and cutting a cable in a rock bolting equipment. The apparatus of the invention comprises a pressure fluid-driven bending piston (2) movable in the transverse direction of the cable, and on both sides of the bending piston (2) in the longitudinal direction of the cable (9) successive counter surfaces against which the cable (9) is pressed by the bending piston (2) to form a bend in the cable on both sides of the bending piston.
