Abstract (en)
[origin: EP1027847A2] The door comprises a glazed panel with at least two spaced-apart parallel transparent sheets (12, 13) rigidly joined together by an interposed perimetral spacer (15) extending along the entire perimetral edge of the sheets to close the interspace (14) defined by the sheets; the door comprises a first profiled element (21, 121) extending along one side of the glazed panel, to which it is rigidly fixed, and having at least one corridor (31, 131) for containing the means for securing the hinge to the cabinet structure (9); the panel (11) is fixed to the cabinet structure only by means of said profiled element (21, 121) and is supported only by this, without the aid of any rigid whole frame enclosing the panel. <IMAGE>
