Abstract (en)
There is disclosed a sealing strip adapted to form a seal between a wall or vertical panel surface and a horizontal surface of a member that meets the vertical surface such as the surface of the rim of a bath, basin or shower tray rim or a kitchen work top, comprising, in transverse section a rigid, upstanding portion adapted to be held against the vertical surface above the horizontal surface; a rigid, depending portion adapted to be held between the vertical surface and the member; the upstanding and depending portions being connected by a nose-like portion adapted to cover the edge of the horizontal surface. <IMAGE>
