Abstract (en)

[origin: EP1027943A1] A hollow cast component, having an externally accessible recess (15) for accommodating a closure piece (14) transverse to a core opening (13). A hollow cast component, having one or more core openings (13) to be subsequently closed, has an externally accessible recess (15) positioned transverse to the or each core opening within its interior and/or at an internal surface adjoining an enclosed cavity (12), the recess (15) intersecting and covering the core opening and a closure piece being located in the recess to close the core opening. An Independent claim is also included for production of the above component.
