Abstract (en)  
A steering assembly for means of transport comprises at least one truck (2) supported by a supporting structure (3) which is rigidly coupled to the means of transport and has, in an upward region, a central center bearing (5) for the coupling of at least one axle (12, 13) so as to allow rotation about a vertical axis (10, 11); the axle (12, 13) has, at its two ends, wheels (14) which rest on the ground or on another support; the wheels (14) are provided with electric or hydraulic motors (15) or the like which are controlled by electric and/or electronic control means and are adapted to produce the rotation of the axle (12, 13). <IMAGE>
