Abstract (en)

[origin: EP1028069A1] The container for storing mixture components has a first container (3) for a first component having a neck (23). The neck of the first container fits into a collar (10) of a second component container. A closure (32) is movably mounted in the collar. A cap (14) between the closure and the opening of the collar defines a third storage space for the third component.
