Abstract (en)
[origin: EP1028197A2] The invention relates to a traffic bump, which is movably mounted into a road surface. In a non-activated state, the upper side of the traffic bump is located at the road surface level. In a first embodiment the activated traffic bump rises 10 cm above the road surface and passes a message to a passing road-user. In a second embodiment, the activated traffic bump rises 30 cm above the road surface and effectively blocks all traffic. <IMAGE>
