Abstract (en)
[origin: EP1028216A2] A locker system has a number of individual locking compartments each having a lockable door and comprises a frame construction, the locking compartments being connectable to this frame construction. The frame construction can be releasably connected to a fixed box structure, and the compartments can be fixed to the frame construction in such a way that an accessible outer wall of the locker system is formed which is substantially covered by the lockable doors of the compartments. <IMAGE>
