Abstract (en)
[origin: EP1028297A2] The heating and pumping module has a heat generator (9) with a heat container (37) and a pump (25) integrated into it. The heat generator is combined with the heat container and pump to form a compact unit. The pump can be arranged in the heat container or in a sealed pump container (41) with external suction and outlet connectors (29,28).
