Abstract (en)
[origin: WO9921465A1] The invention relates to a stove fired with charcoal, wood or similar fuel, said stove being made from metal, particularly from stainless-steel sheet metal, the casing (1, 2) of said stove being essentially cylindrical and said stove having an essentially horizontal grate (3) inside said cylindrical casing, in the lower portion of the stove, said casing comprising an inner shell (2) and an outer shell (1), said shells having an air gap (11) provided thereinbetween. The invention is implemented having at least a portion of the stove inner shell (2) provided with holes (10) opening into the air gap (11) and said holes serving for the introduction of secondary combustion air into the fuel chamber and said air gap (11) having a closed upper end.
