Abstract (en)

[origin: WO0014348A1] The invention refers to a screw coupling device (1) for covering curtains (16) of spatial network structures, comprising: a hollow body (2) fixed to the spatial network structure; a pad (13) brought into contact with said covering curtain (16); extensible means placed between said hollow body (2) and said pad (13) suitable for changing the reciprocal distance between said hollow body (2) and said pad (13) and allowing the oscillation of the pad (13) relative to said body (2).
