Abstract (en)

[origin: DE19748745A1] An internal combustion engine (1), in particular for a motor vehicle, is provided with a controller for controlling and/or regulating the output from the internal combustion engine (1) depending on operating parameters of the same, and in particular on the driver's wishes. The controller can determine an admissible output alteration during a predetermined period of time and an actual output alteration during a corresponding predetermined period of time (6, 7) and compare them with each other (8).
